OUR COURSES

Level 1 Stormwater Operator Certification

Designed for field maintenance personnel such as foremen, technicians, heavy equipment operators, road stabilization crews, crew leaders, etc. This entry level course provides a broad overview of stormwater operations and maintenance. Helps meet the training/refresher training requirement of your MS4 Permit.

Level 2 Stormwater Operator Certification

Designed for senior-level foremen, managers and supervisors. The course is intended to provide the tools necessary to effectively implement the organization's goals and objectives. Eligible for 12 College Credits towards an AAS Degree in Industrial Management Technology. Helps meet the training/refresher training requirement of your MS4 Permit.

FDEP's Stormwater, Erosion & Sedimentation Control Inspector Training

The goal of the program is to increase the use of proper design, construction and maintenance of erosion and sediment controls during construction and to assure their proper long-term operation and maintenance. Certification awarded by FDEP. Classes offered based on demand.

CLASS FEES

In-person Certification FSA Members: \$219 | Non-Members: \$279

Online Recertification* FSA Members \$149 | Non-Members \$199

*Recertification is required every five years.
